Photo taken April 20, 1922, of the original plant of our New Rose, Climbing Columbia, now three years old. This plant has bloomed continually through the summer and now at this time, November 10th, is in full flower, with many beautiful full blown flowers and buds in all stages of development. In 1921 the last flower from this plant was cut December 18th, a beautiful long stemmed flower, five inches in diameter. Be sure to include Climbing Columbia in your order.

Our Greenhouse Plant is thoroughly equipped with all modern appliances for growing plants of the very best quality.

This view shows Plant "A", of 60,000 square feet of glass, with packing house in rear. In this range of houses, are kept all plants ready for immediate sale. Plant "B" is of equal size, wherein are housed most of our "Mother" plants from which many, many thousand cuttings are taken each season. Plant "C" is the propagation houses, capable of turning out 150,000 young plants per month.

SHOULD YOU RECEIVE two or more catalogues alike, which sometimes occurs, have the kindness to present such as you do not need to others who will likely want plants. By doing so confer a double favor. BETTER THAN WE PROMISE. We always do better than we promise in the way of extra plants, so when the order will at all afford it we add to it some plant or plants gratis, often choice new kinds; several of the Roses now so eagerly sought after were first introduced to our customers in this way—presented with their order.

ORDERS BY EXPRESS. Two-year-old Roses, large size shrubbery, fruit trees, etc., are too large to mail and must be sent by express. We recommend that customers instruct us to ship smaller size plants also by express, when in our judgment it is best to do so. We can send larger plants this way and can leave most of the earth on the roots, which is, of course, much better for our customers. Express charges must be paid by the purchaser, unless otherwise agreed. But we are careful to pack as light as safety of the plants will permit and add as many extras as we can afford to help cover charges.

WE GIVE CLOSE personal attention to every part of our business and are always glad to assist our customers in every way we can.

OUR GUARANTEE. All goods are guaranteed to reach you in good condition; mistakes, if made, will be promptly rectified. Accept shipment, examine and count on receipt and notify us at once should there be any errors and the carrier as well, if any damaged stock. This guarantee not good unless above requirements are complied with. **WE DO NOT GUARANTEE GROWTH.** Remember a tree, shrub or plant is a living organism, as much as a cow, horse, or man. It breathes, drinks and feeds and is liable to attacks of disease and insects. At prices we sell, it is impossible for us to guarantee growth or to be responsible for stock after delivery to our customers in good condition.
(Signed) **JOS. W. VESTAL & SON.**

NON-WARRANTY. While we hold ourselves in readiness, on proper proof, to replace free of charge all trees, etc., that may prove untrue to label, or refund the amount paid, we give no warranty, expressed or implied, as to description, quality, productiveness or any other matter of any nursery stock, seeds, bulbs or plants, we sell.

Vestal Roses and How To Grow Them

"He who would have beautiful Roses in his garden must have beautiful Roses in his heart. He must love them well and always. He must have not only the glowing admiration, the enthusiasm and the passion, but the tenderness, the thoughtfulness, the reverence, the watchfulness of love." So wrote Dean Hole, the rosarian of beloved memory.

Angelus Roses. A Perfect Mass of Bloom.

WHO SHOULD PLANT ROSES

Everyone should plant Roses. There is no home, worthy of the name, where space could not be found for from ten to one hundred Rose bushes. If a renter, plant Roses; you will get returns in beautiful flowers in from two to three months. If a flat dweller, and you have three or more windows, you can plant ten or more Rose bushes in window boxes. The results will be a delight, and you can move the window boxes with other personal belongings, when moving day comes around. If a home owner, it matters not how pretentious or humble, nothing can make it more home-like, more attractive and inviting, than a well-selected Rose planting. If a landlord, there is no improvement that can be made at so small an expenditure that will so quickly enhance the rental value and desirability of property, insuring permanent tenants, as a good Rose planting.

SOIL

Amateurs sometimes think that planting Roses is a serious job and one to be approached with fear and trembling as to probable results. This is not at all true, as it is a job which does not need an expert, and may be done quickly.

While Roses may be grown in any good soil, they flourish better in a rather clay loam than they do in light or sandy soil. To those not acquainted with soils, it will be well to explain that almost any soil that is not sandy or gravel may be classed, in a general way, as clay, and if it is good enough to grow good farm crops or garden vegetables, it is good enough to grow Roses, and does not need the addition of any great quantity of manure. Application of enough manure to just cover the soil from sight is usually sufficient, unless the soil is quite poor to start with. Good stable manure is best; it should not be too fresh, but at least partly rotted. If you can not procure this, the dried cattle and sheep manure that is now sold in sacks is good.

Many amateurs make the mistake of having their Rose beds too rich. We knew of one who took out the original soil to a depth of two feet, filled in the bottom of the trench with eight inches of manure, packed solidly, and finished with soil which was one-half manure. This is entirely too much manure, and Roses planted in such a bed would not be likely to remain healthy for any time. Even had he left out the manure at the bottom, the soil would have been too rich as one-fifth or one-fourth manure is enough. We do not advocate placing clear manure at the bottom of the bed, though some planters have had fair success in making beds that way. Any soil you get must come from the surface; that is, the first six inches of a good field or garden. It is not well to use chip dirt, woods' earth or rotted leaves with Rose soil; such material is good for many plants, but not for Roses. Of course, the manure used when Roses are planted will become exhausted and must be replaced by a top dressing of manure; or fine ground bone may be applied at the rate of three pounds to the square yard. As a rule, this top dressing should not be applied more often than once a year. If your soil is very poor or has been filled in with brickbats or refuse, as many city lots are, it would be best to remove it entirely to a depth of eighteen inches and fill with good soil that is fine and mellow and properly mixed with manure.

American Pillar Grown in Bush Form.

The best time to apply manures is just as the ground begins to freeze in the autumn; let it serve as a protection over winter and dig it in next spring. Even with the best of care it may prove necessary at times, say after six or eight years, to renew the Roses or move the bed, adopting the farmer's principle of rotation of crops.

TIME TO PLANT. The proper time for planting in the various sections of the country largely depends, first upon the location, and, second, upon the character of the plant. In the warm climate, southern and south-western states, in fact all sections where frosts are infrequent and the winters mild, pot-grown as well as dormant Roses may be planted in the late fall, as well as in the early spring. In the southern states fall planting of both these classes of Roses is considered desirable, but, if the conditions are such that it can not be accomplished, then in the early spring months they may be set out with entire safety.

COMPARATIVE VALUE OF ROSES. Don't think any Rose too small to do well. The roots of one-year plants being carefully protected in pots, permits of the shipping and successful planting anywhere. Roses of this size are to be recommended for all Rose growing sections. If you wish the largest and best Rose for quick effect, then Roses of the two-year size from four to five-inch pots are to be recommended.

ADVANTAGE OF POT GROWN ROSES. There is another advantage in planting pot-grown Roses; namely, that they can be planted at any time of the year. The ball of earth contains all of the fine fibrous roots, and when the plants are shipped transplanting can be done with no more injury to the plant than if the Rose had simply been removed to a larger sized pot. The growth continues just the same and the roots do not have to establish themselves, as is the case with the dormant plants. The pot-grown Rose, therefore, has many advantages over other Roses.

MULCHING. The main object being to retain the moisture rather than to enrich the soil, cultivate the garden once a week up to the middle of July, to maintain a dust mulch; after that, a liberal covering of "long" cow or horse stable manure that will not heat will accomplish this purpose best.

HARDINESS. Hardiness in a Rose is a matter of which no one can speak with positive certainty, because the condition of the weather as a rule prescribes the hardiness of a plant, as quite frequently plants that have been out year after year will be winter killed by unusual conditions. As stated elsewhere, the hardiness of the different varieties of plants can be depended upon to be as near accurate as it is possible for any one to determine.

WINTER PROTECTION. Where the temperature gets below freezing, the less hardy Roses will require protection, and all of them will be the better for it, at least about the roots. Soon after the first frost, having hilled up the soil around the stems, cover the Rose beds all over with a 3 or 4-inch layer of good heavy stable manure, and over this a 6-inch layer of leaves, held in place by the most slightly material available. A 12-inch fence of poultry wire will keep the leaves in bounds nicely. If the leaves are not available, straw, corn-fodder and even boxes put over the Roses to shed the rains, will protect from the cold, biting winds and the alternate freezing and thawing of early spring sunshine and cold nights; but do not smother the Roses, for if too tightly covered they will die. Remove the covering gradually in the spring when danger from frost is past.

TREATMENT ON ARRIVAL. When you receive the Roses, give them the greatest care; never expose the roots to the drying action of spring winds for a moment. A plant with bare roots exposed to the dry air is like a fish out of water. Should the plants, through delay in transit, come dried out, as occasionally happens, soak the balls of earth and roots in water; if the stems have dried out, after soaking the ball, bury the whole plant in damp earth for several days. This treatment may put them in good condition, while if they are planted when dried out there is danger of their dying.

How To Prune Your Roses

Pruning is the art of improving the productive power and the appearance of a plant. It consists of two distinct operations. 1. The removal of dead, weak, overcrowded, and otherwise useless shoots. Unripe wood which in the spring will usually be found to have discolored pith, caused by the winter frosts, should be cut clean away at the base of the shoot. 2. Pruning Proper, the shortening of those shoots which are allowed to remain after the thinning-out process has been completed.

The most frequent errors made in pruning are: (1) leaving too many shoots when thinning out; (2) pruning severely the shoots of varieties which require little, if any shortening; (3) pruning lightly the varieties which require severe pruning; (4) leaving Rose plants crowded with shoots and cutting these to a uniform length all over the plant in a similar way that a hedge is clipped.

In thinning out a shoot, it should be either cut clean away to the base of the plant, or to its starting point on the elder shoot from which it springs, as the case may be. When the plant has been pruned, the shoots should be left as nearly as possible equidistant from each other, and regularly arranged around it so that it presents a well-balanced appearance on all sides.—National Rose Society's Handbook on Pruning.

ROSES HURT WITH THE WINTER. When Roses are hurt with the winter, cut all the injured branches off down to the live wood, and if you have "Own Root Roses," and the roots are not hurt, they will soon throw up new shoots and bloom as well as ever.

DISEASES AND INSECTS

GREEN AND BLACK FLY OR APHIS. A green sucking insect which usually gathers in great numbers upon the tips of the new growth. A solution of tobacco made from tobacco insecticide soap, will exterminate them.

LEAF ROLLER. Is an insect of yellowish-white color, resembling the butterfly, and lays eggs on the under side of the leaf, which soon form a cocoon, rolling around itself the leaf, hence the name, leaf-roller. Arsenate of Lead is the remedy.

BLACK SPOT. A fungus disease, appearing as its name indicates as a black spot upon the leaf, eventually turning yellow and falling. It rarely occurs in the early part of the season, and the Teas are almost but not quite exempt from its ravages. The best preventive if your bushes have been troubled by it in the past is spraying in April before the foliage has developed and not while the flowers are in bloom, because of the discoloration of the foliage. The disease usually appears at the base of the plant and works upward, so a watch should be kept and as soon as any leaves appear affected with this disease they should be pulled off and taken entirely away from the balance of the plants. If this is thoroughly done it will usually hold the disease in check. Use Bordeaux Mixture as a preventive.

Showing where to Prune

can be checked to a certain extent by sprinkling the leaves with powdered sulphur immediately after its appearance, or better still, use Bordeaux Mixture as a preventative.

RED SPIDER. Is also a small insect indiscernible to the naked eye, and a frequent spraying with a strong hose is all that is necessary.

ROSE BUG. A familiar insect, appears in the earliest summer, sometimes in great quantities, and very troublesome. It is a very destructive insect and usually feeds upon the white petals, but is easily destroyed, especially in the early morning, when they will readily fall into a vessel containing kerosene. They can be poisoned, but it is not a very desirable way to get rid of them. This is a spray with wood alcohol, which will kill any insect by contact, operates quickly and does not injure the flower if applied in a mist-like spray. Care should be exercised by the operator not to inhale any of the fumes.

INSECTICIDE

THOMPSON'S ROSE NICOTINE is chemically pure nicotine and quick death to insects on Roses. Very convenient to use—no trouble, no odor, no staining; simply apply as directed with spray pump or plant sprinkler. Small can, 50 cents; larger size, 90 cents, postpaid.

ARSENATE OF LEAD, POWDERED. May be used either as a dust diluted with hydrated lime, plaster or road dust, or as a liquid spray with water, lime-sulphur. solution or Bordeaux, only half the weight is needed as of the paste form. Price, one-half pound, 40 cents; 1 pound, 70 cents.

SLUG SHOT. Is an Insecticide for the destruction of Potato and Rose Bugs, and all Lice, Worms or Caterpillars upon Melons, Eggs, Cucumbers, Cotton, Tobacco and Cabbage Plants, Tomatoes, Currants, Fruit or Ornamental Trees, Grape Vines, Shrubs and Flowering Plants. An admirable remedy for the Black Clematis Bug.

DIRECTIONS FOR USE. Slug shot is an impalpable composite powder, to be dusted upon the plants. It contains poison, thoroughly diffused through natural fertilizers, and is perfectly safe in its use to man and beast. Price, 1 pound package, 25 cents, postpaid.

DRY LIME-SULFUR. The best remedy for San Jose and other scale insects on trees and shrubs. Use 1 pound to 15 gallons of water. Full directions with each package. Price, 1 pound cartons, 50 cents, postpaid.

TOBACCO POWDER. The Sprinkling Kind for Sprinkling or Dusting Only, is made from heavy black leaf tobacco, strong in nicotine, and so finely pulverized that it can be applied with an ordinary magazine bellows gun direct to plants, indoors or out, or sprinkled around the hothouse to keep the pests in check. Price, one-pound package, 50 cents.

SULPHO-TOBACCO SOAP. Another splendid insecticide. Directions for use on every package; 3-oz. cake, makes 1½ gallons prepared solution, 15 cents each; 8-oz. cake, makes 4 gallons prepared solution, 30 cents, postpaid.

GLORIO

A Beautiful Scarlet Cerise with Yellow Shading at the Base

This splendid rose is one of the very best of its color, being a beautiful scarlet cerise, with yellow shading at the base of the petals, heavily veined with reddish cerise and with a deep glowing heart of bright pink, which brightens up the flower wonderfully. In bud form this Rose appeals to every one on account of its wonderful coloring, which is entirely distinct and not found in any other Rose. You will admire the foliage, too, deep green leaves on red stems and the new growth of rich garnet; the plant will grow for you vigorously, is among the hardest in this class and blooms abundantly. One of the very best of the new Roses, and one that has so many good qualities that we are quite certain it will find a place in the garden of every flower lover. OUR NEW ROSE

JOSEPHINE VESTAL

"A Rose of Attractive Coloring"

In this magnificent Rose, we find a Rose of attractive coloring. In our estimation, this new Rose has the brightest future of any Rose introduced for the last quarter century. The color is one so difficult to describe that any description can only be a partial one, and gives but a faint idea of the superb beauty and richness of the shades. It might be described as salmon-flesh shaded Rose, with a touch of yellow at the base. Buds of unusual attractiveness, opening full and double, like the old Malmaison, but decidedly brighter; unusually long and beautifully pointed with petals of wonderful depth and substance, retaining their shape longer than most Roses. The variety is of fine branching habit and ideal growth, a beautiful and most bushy Rose. Its color is not its only charm as its fragrance fills the room with a delicate pure rose perfume. It ranks one of the best of the garden Roses. The illustration conveys but a faint idea of its beauty and formation, which is of large and perfect shape. Habit excellent, growth strong, and almost thornless, produces flowers on long stems, well up above the foliage, and in great profusion all summer. Hardy in almost all localities. Grand for outdoors. Price, one-year plants, 50 cents each; two-year plants, \$1.50 each.

This is one of the newer Roses that have been brought prominently before the public this season and we have not seen a Rose that has met with such universal appreciation by both amateur and professional growers. It is hardy in practically all localities and as an outdoor garden Rose it has no superior. Of strong, vigorous, healthy growth, branching freely; it produces its wonderful blooms profusely from April until December. ROSE PREMIER

Remarkable For Its Large Size, Clear Color, Sweet Fragrance, Free Growth, and Luxuriant Foliage

PREMIER is a cross between *Ophelia* and *Russell*. It resembles the former in its strong thornless stems and quick growth. Its ample foliage is similar to that of *Ulrich Brunner* and in arrangement and size of leafage it possesses the character of *American Beauty*. **Premier** is truly a big Rose that is ideal among the ever-bloomers; its stiff stems hold the immense flowers upright and what is more remarkable, the stems are almost free from thorns, the upper stem especially being thornless. The flowers are of the *Russell* type, large and broad petaled, of glorious pink color, and grand in form. The foliage is large and durable and beautifully set, the leaves broad and dark green, making a fitting background for the fine bloom. To crown its other perfections it has a delicious June Rose fragrance, which is most enchanting. It produces quantities of blooms during the season and seems to claim the **Premier** place among American Roses. Price, strong one-year-old plants, 30 cents each; two-year-old, 75 cents each.

Rose Premier. A Glorious New Rose.

GIGANTIC IN SIZE—FREEDOM IN BLOOM

Could be rightly called the Giant Pink, owing to the enormous blooms it produces. Of distinct merit, being an extremely strong, rank grower, one of the strongest of the everblooming, blooming as it does with the greatest freedom, the buds carried on long, stiff, erect stems, of the very largest size imaginable in a Rose bloom, open flowers often measuring six inches across, full of petals and of wonderful depth, which it retains in perfect formation. Very fragrant. Color, clear imperial pink, on the order of La France, deepening as it opens to glowing pink. A peculiarity of the variety is that the shades all become more intense until the full maturity of the open flower is reached, and this color is enduring. Being fully double makes it a fine summer Rose, particularly adapted to garden culture. We feel that after all is said, we have not said half enough for Columbia. Price, one-year, 20 cents; two-year 60 cents.

GENERAL McARTHUR

One of the Very Best Red Bedding Roses.

General McArthur is as fragrant as a Rose can be; has good sized flowers and blooms continuously. The bud, when first opening, is the brightest crimson-scarlet and the flower retains this perfect coloring until it drops its petals. Blooms continuously the whole season through and gives fine stems for cutting. Its habit of growth is remarkably good, making strong, shapely plants that may be depended on for large flower shoots. A great favorite. Price, one-year-old plants, 15 cents each; two-year-old plants, 60 cts. each.

ETOILE de FRANCE

One of the best and sweetest hardy Roses of its color. The strong, upright bushes have beautiful bronze green foliage, which is not subject to insect attacks. The bushes are blooming constantly, producing large, massive, deep, full cup-formed flowers on magnificent, long, stiff stems. They are of truly glorious form and delightful fragrance, while the color is exquisite—a clear red of velvety crimson. Price, one-year-old plants, 20 cents; two-year-old plants, 75 cents each.

WHITE LA FRANCE. A seedling of La France; extra large, full, deep, pearly white flowers, delicately shaded with soft rose; exquisitely beautiful and delicately fragrant.

THE STRIPED LA FRANCE. An elegant new Rose, closely resembling La France in form and substance, but the flowers are distinctly striped with pearly-white and satin-rose.

CITRONELLE

The Best Golden Yellow Rose

For years Rose-growers the world over have sighed for the advent of a genuinely golden yellow, hardy, everblooming Bush Rose. Last year we secured this wonderful Rose. Instantly it was hailed with delight, for it represented a new color in its class, and since its introduction it has become one of the three best-selling Roses in our entire collection.

It grows to perfection in almost any ordinary soil in all sections, and from the time it is planted in the early growing season, it bears continuously great numbers of lovely flowers of immense size, elegant, full, deep and double on stiff, erect stems, which stand out well above the plant, giving it a regal appearance and stamping it as the most extraordinary Rose of its color yet introduced.

The color of the flowers is deep golden yellow. Now and then in the early stages of development its petals have faint streaks of pink, but as the flower develops fully, it is pure golden yellow without a blemish; in short an eighteen-karat flower of sterling merit. Price, one-year 25 cents; two-year \$1.00 each.

From early spring until late fall its glorious full double flowers in all their perfection are produced continuously on long, stiff, erect stems; color, delicate creamy white, with a delicious magnolia-like fragrance, exquisite buds, absolutely hardy. Price, one-year-old plants, 20 cents each; two-year-old plants, 60 cents each.

MADISON THE GRAND WHITE ROSE. One of the most beautiful Roses we know of. The petals are of enormous size and of ivory-like substance. The flower is unusually long and pointed, and retaining its shape and form practically to the last. A strong characteristic is the way it unfolds its guard petals, the inner petals retaining that beautiful spiral form, making it perhaps the most model shaped flower grown. The color is a pearly cream. It is also marvelously free-blooming and very sweet-scented. Price, one-year, 20 cents; two-year, 60 cents.

YELLOW KILLARNEY Mme. Jenny Gillemot. A brilliant saffron-yellow Rose, opening carney with dark golden shades. The buds are long and pointed, beautiful in form and color, the flowers are large with immense petals. Hardy and vigorous, it is in constant bloom all summer. Blooms are produced on long, stiff stems, making an excellent Rose for cutting. Owing to its resemblance to the Killarneys we have called it the Yellow Killarney, as it makes a good companion for them. Price, 20 cents each; two-year, 60 cents each.

BRIDESMAID One of the Most Beautiful of Pink Tea Roses. This variety is valuable for cutting and does finely in the open ground; a sport from the old and popular pink Tea, Catherine Mermet, but of a fine, clear, dark pink, much deeper and more constant than Mermet. The bush is a strong, vigorous grower, bearing its flowers on long, sturdy stems. Altogether one of the finest Roses for garden culture and one which is a universal favorite for all occasions. Price, one-year, 15 cents; two-year, 60 cents.

THE BRIDE Standard White Rose of Excellent Form and Color. There is no other white Rose more satisfactory than the Bride. The buds and flowers are unusually large, well formed and deliciously perfumed. When planted in the open ground the flowers are sometimes found to be delicately tinted with pink, making it exceedingly attractive. It is of a strong and healthy growth; and a profuse bloomer. Its blooms are of the most suitable form and quality for cut flowers. Price, one-year, 15 cents; two-year, 60 cents.

Wellesley—The Grand Rose

"As Fine as a Rose Can Be"
Flowers Bright Pink

Wellesley is a Hybrid Tea Rose, as fine as a Rose can be; has good-sized flowers and blooms continuously. The bud, when first opening, is a beautiful shade of bright pink and the flower retains this perfect coloring until it drops its petals. Blooms continuously through the whole season, and gives fine stems for cutting. Will stand the winters any place south of the Ohio River, but north of that line it should be protected. Price, 15 cents each; two-year-old plants, 60 cts. each.

NEW ROSE WM. R. SMITH

A Vigorous, Healthy Grower, Excellent In Quality and Beautiful in Bloom

Whether you live East, West, North or South, whether you wish one Rose or 1,000, here is a Rose which has our unqualified endorsement. It will thrive abundantly in almost any reasonable location. The flowers are large, full and double, and most exquisitely formed. The petals are so firm they look like wax, softly curled, colored cream with flesh tint tips, buff yellow-base and the center a heart of pink. Perfect buds. The flowers are borne on long, strong stems, just right for making bouquets. Fragrance is delightful. This Rose is a great favorite with us because of its splendid merits. Price, one-year, 15 cts.; two-year, 60 cts.

Climbing Columbia

A Hardy Everblooming
Pink Climbing Rose

The Latest
and Most Beautiful Rose of
Recent Introduction

April 19th, 1922.
Vestal & Son,
Little Rock, Ark.

Gentlemen—My roses
arrived in nice condi-
tion, and I must tell
you how I appreciate
them. They are lovely
plants and not one
wilted. With many
thanks, I am sincerely,
Mrs. J. W. F.,
Meridian, Miss.

CLIMBING COLUMBIA introduced and offered for sale by us. This Rose originated here on our place and no stock of it has yet been sold to anyone. We control the entire stock of this magnificent Climbing Rose, so don't be misled by the claims of others. This Rose is a sport of the well-known Hybrid Tea Rose, "Columbia," and has all the desirable features of its parents, with a remarkable climbing tendency, growing 10 to 15 feet in a single season. Foliage deep glossy green, immune from disease and insects. Hardy in any location. Blooming with the greatest freedom the entire season. Equally as well in the far South as in the North. Buds and blooms of immense size, often measuring six inches in diameter, and perfect formation, borne singly on long shoots, thus making it an ideal one for cutting. Buds long and pointed, same as "Columbia," opening full and double. Petals large. Color, clear imperial pink with paler edges, beautifully dark veined; delightfully fragrant. This Rose has so many good qualities that we

predict it will soon be one of the leaders in its class, and those who are fortunate enough to secure a plant of it this season will be able to enjoy its beauty and be the envy of their less fortunate neighbors for several seasons, as our stock is limited, and orders will be filled in rotation in which they are received. Price, strong first size or one-year-old plants, 50 cents each, postpaid; two-year-old plants, \$1.50 each. All grown on their own roots, and good, clean, healthy stock.

Marechal Niel

THE FAMOUS ROSE

The fame of the superb yellow Rose, Marechal Niel, with its large, deep, golden-yellow flowers, is world-wide. It is almost universally held to be the finest Rose for indoors or outdoors, where the climate admits of its cultivation. Its magnificent golden-yellow flowers are almost massive in dimensions, and reports from growers tell of single plants showing one to two thousand blooms at a time. It is of strong growth and beautiful foliage. It is grand in petal, shape, color, fragrance, lasting qualities and size, and extremely free bloomer and flowers throughout the season. Contrary to many Roses, which lose their color after opening, Marechal Niel decidedly improves and takes a deeper yellow after being kept for a day or two. The tea fragrance is strongly present in this Rose. It is a variety which practically stands by itself. Price, 20 cents each; stronger plants, 50 cents; two-year-old plants, \$1.00.

TAUSENDSCHOEN, OR THOUSAND BEAUTIES

A Grand Hardy Climbing Rose

A beautiful new climbing Rose which has leaped into popularity by its inherent merit and beauty. The name, "Thousand Beauties," is very appropriate and refers particularly to the wonderful variety of colorings found on any one plant. The flowers are soft pink at first, but as they age the most beautiful shades of carmine-rose, cerise, blush and soft white with a gleam of light yellow, soft crimson and intermediate tints; a combination of charming coloring, which is bewildering. Price 15 cents each; two-year-old plants, 75 cents each.

ROSARIE

A great improvement on the popular Thousand Beauties (Tausendschon), and consequently a welcome addition to this section. While it has the same habit of growth and general characteristics as Thousand Beauties, the color is superior—a deeper and more even shade of cerise-pink or carmine. Those who have admired Thousand Beauties will surely add this improved variety to their collection because of its lovely coloring. Price, 20 cts. each; two-year \$1.00 each.

Climbing Meteor

A superb everblooming climbing Rose. A sport from Meteor, famous for its magnificent flowers. True climbing habit, attaining a height of 10 to 15 feet in a single season. Free, persistent bloomer, with magnificently formed buds and flowers. Dark, velvety crimson, the equal of any Rose in cultivation. Hardy, with protection, and will give absolute satisfaction. Price 20 cents each; two-year-old plants, \$1.00 each.

Marechal Niel

Climbing Sunburst

A climbing sport of that peer of yellow roses, Sunburst—the much-sought new French rose. A true pillar rose of strong growth, bearing freely; very large cadmium yellow flowers beautiful either in bud or open flower. One-year-old plants of this variety only 35 cents each. Two-year-old plants \$1.50 each.

Reine Marie Henriette

A strong growing and climbing Rose, making a grand pillar Rose in the South. Flowers full and well formed; rich, brilliant crimson. A grand Rose and a fine companion of Marechal Niel. Try it. Price, 20 cents each; large size, \$1.00 each.

Ruth Vestal

A strong and vigorous grower and true everbloomer. Pure snow-white buds, and flowers of the largest size and perfect form. Exceedingly fragrant. Price, 20 cents each; two-year-old plants, 75 cents each.

Rosarie

CLIMBING GRUSS AN TEPLITZ

A climbing form of Gruss an Teplitz. Unquestionably one of the finest climbing Roses ever introduced. The color when first opening is very dark rich crimson, quickly changing to bright scarlet, shading to a velvety fiery red. The flowers are very showy and handsome. Remarkably healthy and vigorous; almost immune from all diseases. Price, one-year-old plants, 20 cents each; two-year-old plants, \$1.00 each.

CLIMBING AMERICAN BEAUTY

Here we have the latest triumph in American Rose growing, the true Climbing American Beauty in all its promise and glory, the realized dream of every Rose grower. Just the same as the American Beauty practically. Large flowers, each produced on separate stems, vivid rosy-crimson in color, with delicious fragrance. Borne in the greatest profusion throughout the growing season. Foliage tough and leathery, deep, glossy green, sun and insect proof. The youngest plants attain a height of 10 to 15 feet in a single season. Hardy and as sturdy as an oak in all localities. Splendid in the South. For single specimens, trailing over verandas, for trellises, anywhere and everywhere, this Rose will give the greatest satisfaction. Words of description can hardly do justice to this magnificent Rose. Absolutely true to name, on its own roots. Strong one-year-old plants, 20 cents each; two-year-old plants, \$1.00 each.

Climbing American Beauty

American Pillar

If ever there was a Rose constituted to stand the trying conditions of our American climate, we have it in this unique, hardy, free-blooming climber. It will thrive in poor soil as well as in rich, and insists on growing vigorously. It has stout, thick, curving branches, rather thorny, but furnished with an abundance of glossy dark green leaves. It is one of the first to start growth in the early spring, and here holds its leaves of lively green till far past Thanksgiving Day, and it is seldom troubled with insects. It begins blooming here early in May. Single flowers of rich, rosy pink approaching brilliant carmine, just a glint of white in the center, and long stamens of beautiful golden yellow. The blossoms—four to six layers deep—are arranged in large-flowered clusters all over the plant. We estimated certainly not less than 3,000 flowers on one young bush. A tremendous grower, with its thick vigorous canes, it is without doubt one of the most valuable single climbing Roses in existence and is unsurpassed for planting singly or as a hedge. In autumn it is again a brilliant show of color with its pretty clusters of bright red seed-hips which remain on the bush until well into winter. Price, 20 cents each; two-year-old plants, 75 cents each.

CLIMBING WHITE MAMAN COCHET

Just as the old favorite White Cochet is one of the very best of all White Tea Roses, so we believe this new White Climbing Tea will jump into the widest popularity. It blooms continuously all summer, bearing the greatest profusion of perfect White Cochet Roses, and the plant grows with wondrous strength and vigor. This is without doubt one of the finest white everblooming Climbing Roses. Price, 15 cts. each; two year old plants, 75 cents each.

CLIMBING OPHELIA

A Climbing Sport of the Well Known Rose Ophelia

Ophelia stands today as the best Rose of its color—a delightful shade of salmon-flesh pink, shading to yellow at the base of the petals in the open flower, making it very attractive. A color lacking heretofore in Climbing Roses. It grows well and blooms well. The growth is extremely vigorous, an established plant in good garden soil will develop growth to the extent of ten to twenty feet in a season and is sufficiently hardy to stand our average southern winters without protection. Nice one-year-old plants, 30 cents each; strong two-year-old plants, \$1.00 each.

CLIMBING MADAME CAROLINE TESTOUT

Covered during the season with immense globular flowers of the same beautiful shade of pink as seen in the bush sort. Without doubt the finest pink climbing Rose to date. Price, one-year, 25 cents; two-year, \$1.00 each.

GAINSBOROUGH

Its delicate coloring is difficult to describe, being elegantly tinged fawn, almost white and lustrous as satin. When in full bloom it resembles a large fine, fluffy Peony, but without a suggestion of stiffness, often measuring eight to nine inches in diameter. Price, one-year, 25 cents each; two-year, \$1.00 each.

Paul's Scarlet Climber

It is not a Rambler, but an Entirely Distinct Hybrid

and without question the most important addition to our list of Climbing Roses in many years. No other Rose in any class can compare with it for brilliancy of color, which is a vivid scarlet that is maintained without burning or bleaching until the petals drop.

The flowers are of medium size, semi-double, very freely produced in clusters of from three to twenty flowers each on much branched canes, the plants being literally covered with flowers from top to bottom. It is of strong climbing habit and perfectly hardy. Price, 30 cents each; two-year-old plants, \$1.00 each.

Jos. W. Vestal & Son.

Dear Sirs—I wish to say that the plants I received from you were the best I have ever ordered.

Yours very truly,
Mrs. W. H. W., Marshall, Texas.

Famous Rambler Rose

DOROTHY PERKINS (Pink)

This beautiful new Rambler Rose is becoming even more popular than the original Crimson Rambler. And well it may, for it is indeed a finer pillar Rose than that famous variety. The growth of a single season is wonderful, its handsome, glossy green foliage being one of its strong points. The flowers, however, are its crowning beauty, being borne in immense clusters of fifteen to thirty, and possess great lasting qualities. Flowers a beautiful shell pink, very double, with petals artistically crinkled. Remarkably pretty pointed buds. This Rose is extremely hardy and will withstand the coldest weather. We advise our friends to plant this variety where it can be allowed plenty of room, and it will give an account of itself. Price, one-year-old plants, 15 cents each; two-year, 60 cents each.

EXCELSA

New Fiery-Red Rambler Rose

A splendid new Climbing Rose, remarkable in many ways, but particularly in the brilliant fiery-red or intense crimson-scarlet of the flowers. The intensely brilliant color is accentuated by the great masses of giant trusses produced on the plants, and furthermore by the contrast with the green glossy foliage. The flowers are very double; they are larger than any of the Rambler Roses and borne in trusses of thirty to forty on each; the body of the flower is brilliant in color, but toward the edges of the petals they light up with a wonderful scarlet-crimson. Price, one-year-old plants, 15 cents each; two-year-old plants, 60 cts. each.

WHITE DOROTHY

A White Climbing Rose of Indescribable Charm and Vigorous Growth.

This wonderful Climbing Rose is so exquisitely beautiful that it is well worth all the prominence it can be given. Dr. W. Van Fleet bears flowers which, when open, run four inches and over in diameter. The center is built high; petals beautifully undulated and cupped. The color is a remarkably delicate shade of flesh pink on the outer surface, deepening to rosy flesh in the center. The flowers are full and double, of delicate perfume, buds pointed, stems twelve to eighteen inches, and fine for cutting. The foliage is a peculiar shade of bronze green, large and glossy, with spines a bright bronze red. The variety is a vigorous grower, immune from mildew. Price, one-year-old plants, 20 cents each; two-year-old plants, 75 cents each.

SILVER MOON

The flowers run four and one-half inches and over in diameter, clear silver white in color, petals of great substance and beautifully cupped. The center is filled with bright yellow stamens, a very attractive feature. It is floriferous, the plants literally covering themselves with great Clematis-like flowers. They are borne on strong stems, twelve to eighteen inches long, and are delicately fragrant. The foliage is large and abundant, bronze-green, glossy and practically immune from mildew. Price, 20 cents each; two-year-old plants, 75 cents each.

BRAZILIAN PLUME PLANT

(Justicia Carneia)

This plant is a native of Brazil and of the easiest possible culture, and seems to do equally well in all kinds of soil, and in any situation, requiring very little attention; it is, in fact, one of the few plants that everyone can grow successfully. It is a strong, rapid grower, and throws long shoots, each of which is tipped with the beautiful pink plume-like flowers, the ends of every petal drooping in a most charming manner. This new sort begins to bloom when the plant has only three or four leaves and is never out of flower afterward. If pinched back occasionally it makes a very dwarf stocky plant, frequently covered with 20 to 50 large pink flower-heads, lasting a long time. The foliage is also more persistent and highly ornamental, being heavy in texture and very velvety. Price, 30 cents each.

New Bedding Coleus

The Coleus, a plant very familiar to all, is one which, for bedding purposes, can not be excelled. The foliage is very beautiful in many of the good newer sorts, and shows a great variety of markings and fine combinations. It is used in great quantities in private places, in small gardens and in the public gardens and parks. The Coleus is used to best advantage in planting in ribbons of color in the borders along drives, in beds of various shapes, such as stars, crescents, triangles, circles and squares, as the foliage, being of such various colors, can be used with striking effect. Light colors against dark, with borders of contrasting color, which are easily obtained among the yellow, red, striped, mottled brown, blue-black, plum and other colored sorts, secure effects when used on a fine lawn or in the border, hard to make with other plants.

Cultural Directions for Chrysanthemums, Which, If Followed, Will Insure Success

WHEN TO PLANT. Any time after the ground can be worked, even up to June 20th, will give you good blooming plants in the fall.

SOIL. Dig the ground deep; put in quantities of manure. The Chrysanthemum is a gross feeder; if fed well the flowers will be large and the plant strong.

DISBUDDING AND STOPPING. When your plant is eight inches high cut back to a height of six inches. Allow four shoots to grow from this main trunk. When these four shoots are four inches high pinch out the terminal bud and save three or four branches that will spring from each of these limbs. Allow these last branches to attain a height of nine inches, then pinch back for the last time. Allow one bud (flower) to each stem, and that a terminal bud.

WHEN TO LIFT. In localities subject to heavy frosts in

October or November plants should be lifted into large pots or boxes by September 1st. After lifting drench thoroughly, and never allow them to suffer for water. Give manure water if possible, once a week. If protected from frost by sheeting they need not be brought into the house till well into October, and when brought in, place in a room without fire; give plenty of air when not frosty. In cold climate winter in cellar.

BLACK APHIS. Nothing destroys this troublesome insect so easily as clean cold water dashed on forcibly with a syringe.

Each year the taste for Chrysanthemums becomes more exacting, and to meet it we offer only the finest exhibition and cut flower varieties—sorts that are noted the country over.

Bed of Mrs. Alfred Conard Cannas

Magnificent New Cannas

We offer the following magnificent new Cannas, improvements on existing varieties and sure to please all admirers of fine new sorts. These show the great improvement being made in this popular plant. In profusion of bloom they are remarkable; beginning early in summer they send up shoot after shoot, thus continuing in flower all summer. It is no exaggeration to say that the flower spikes, in size, richness, and diversity of color, are equal to many varieties of Gladiolus.

High-grade Cannas have for years been one of our leading specialties, and our fields the past season were a gorgeous riot of color from June to frost, and were admired by many visitors. To those who stopped to look closely at individual varieties, the wonderful improvement in Cannas was very manifest. No other bedding plant will give the same uniform good results in our varied and trying climate. They do well in all sections of the country and stand pre-eminently at the head of the list, succeeding in any sunny position in any kind of soil, but responding quickly to liberal treatment. For best results the beds should be spaded two feet deep and a generous amount of well-decayed manure of any kind thoroughly incorporated, and at all times supplying water freely. For best effect plant in large masses of one color, setting out the plants two feet apart.

HOW TO PLANT CANNAS IN A CIRCULAR BED

Start with one plant of tall growing habit for the center. Draw a circle 18 inches from this one and use a dwarfier variety for this circle, which will require 6 plants; then draw another circle 18 inches from the first circle, or 36 inches from the center, and use a still dwarfier variety for this circle, which will require 12 plants, and plant each succeeding circle in the same manner. Each succeeding circle will require 6 more plants, set 18 inches apart, which is the proper distance, than the previous circle; thus, 1 plant for the center, 6 plants for the first circle, 12 plants for the second circle, 18 plants for the third circle, and so on. A bed 4 feet in diameter will require 7 plants; a 7-foot bed, 19 plants; 10-foot bed, 37 plants; 16-foot bed, 91 plants. For the best effect plant beds in all one variety, as the sloping effect can be secured by making the soil in the bed higher in the center and sloping to the edges. For border around the beds use Acalphos planted 12 inches apart. Price, \$1.50 per dozen.

MORNING GLOW

Another color contrast of more than usual picturesqueness; foliage an olive-green striped and veined with bronze. A greatly improved descendant of Evolution, with well-mounted flowers of exquisite, soft shell-pink and orange center. Price, 30 cents each.

JUANITA

Bronzy orange-color with golden bronze foliage. An exceptionally attractive flower. Price, 30 cents each.

NOKOMIS

Like The President, this is a hybrid of the famous Fire-bird. The foliage is a combination of emerald-green and bronze, beautifully veined, making a lovely setting for the large, vivid crimson flowers. These flowers are most attractive, having a rich silky sheen on the petals and the color is darker than that of any other bronze-foliaged Canna. Price, 30 cents each.

FIERY CROSS

This new variety is one of the most successful flaming reds obtainable in the taller growing kinds. The foliage is full and healthy, a rich bluish green; plant and flower spikes attaining a height of five to six feet. Flowers large, 15 to 20 showing at one time. Color, crimson scarlet. Price, 30 cents.

THE PRESIDENT

By a sweeping majority, this Canna won the honor of being named "The President," for it is so surpassingly fine that no other red Canna could be a competitor. In color, it is a rich, glowing scarlet, and the immense, firm, rounded flowers, 7 inches across when open, are produced on strong erect stalks well above the large, rich green foliage. The President is superior to any other red variety in the quantity and also quality of bloom, and the firm flowers are able to resist drouth and heat to a remarkable degree. "This is one of the most marvelous Cannas ever produced." Price, 30 cents.

Queen Helen or
Yellow King
Humbert

QUEEN HELEN

Or Yellow King Humbert

A green-leaved sport of the popular King Humbert. A majestic, stately variety; with large massive foliage. It has the same habit of growth and free flowering qualities, but the flowers are bright yellow and lightly spotted with red. This is the best yellow Canna now on the market. The flowers are of the largest size, heads full and borne well above the foliage. Price, 20 cents each. \$2.00 per doz.

DRUID HILL

A striking dark-stemmed, deep red-flowered beauty. It has most distinct characteristics. The plant has ebony-red stems and is well furnished with Black-Beauty foliage of more than unusual grace. Such a setting makes doubly effective the well-poised heads of rich crimson bloom. Average-sized flowers, but a color combination as yet unmatched. Price, 30 cents each.

HUNGARIA

A magnificent pink Canna widely used for large solid beds. The petals are large and waxy, made up into round, full trusses. Its color forcibly suggests the well known Paul Neyron Rose, and is unquestionably one of the most popular pink Cannas ever produced. Price, 30 cents each; \$3.00 per dozen.

CITY OF PORTLAND

The color is a beautiful glowing pink, deeper in color than its parent, Mrs. Alfred Conrad, and the flowers are produced in greatest profusion on strong, erect, branching stalks. It is an early and continuous bloomer, blooming freely in hot or cool weather. Canna experts last season pronounced it the "finest all-round pink Canna to date." Price, 30 cents each; \$3.00 per dozen.

Beautiful Decorative Ferns

These beautiful plants for home decoration vie with the Palms for first place in the esteem of flower lovers. They are finely cut and oddly shaped. Ferns give a graceful effect produced by few other plants and they do exceedingly well in the parlor and conservatory. The Nephrolepis family, of which the well-known Boston is a member, has furnished us many beautiful species of late years. We recommend all the varieties listed.

THE BOSTON FERN. This popular Fern has proved one of the best decorative plants of recent introduction. The fronds are much larger than the Sword Fern, and do not stand so stiff, but droop gracefully. Excellent for making large specimen plants, also for hanging baskets. Price, nice young plants, 15c, 25c and 50c each.

COMPACT SWORD FERN. Fitting companion for the Boston; dwarfer, more erect in growth, much darker shade of green, very gracefully arched. Very desirable as a house plant. Price, 15c, 25c and 50c each.

NEW FERN JOHN WANAMAKER. Long, narrow gracefully drooping fronds. It is not so compact in growth as Scholzelii, and therefore does not decay in the center, and is a durable house fern. It is a rapid grower, making an abundance of fronds, and is quite distinct from any other Fern. Price, nice plants, 25c each; larger plants, 50c each.

WHITMANII (Ostrich Plume Fern). More of a dwarf habit than the Boston Fern. The fronds are of entirely different nature. Each frond is subdivided on the order of the Compact Fern, thus producing a very beautiful effect. Its decorative ability is excellent. Prices, 15c, 25c, 50c and 75c.

SMITHII FERN. A greatly improved Ostrich Plume Fern, with extremely finely cut fronds, could be rightly described as Baby Breath Fern. It is of compact form, fronds on wiry stems that do not break down in center. This variety will have a wonderful sale. Prices, 35c, 50c and 75c.

VERONA FERN. Makes a good plant in any size, much finer frond than any crested Fern except Smithii. We consider it one of the best of the newer varieties. Prices, 25c, 50c and 75c.

NORWOOD FERN. A dwarf compact form of Whitmanii, carrying its fronds stiff and erect on wiry stems that do not break down. Makes ideal specimens. Called by some florists Fluffy Ruffles Fern. Very showy. Prices, 25c, 50c and 75c.

TEDDY JUNIOR. New dwarf Fern. Fronds are broad and beautifully tapered from the base to the tip, drooping just enough to make a graceful plant. Produces nearly four times as many fronds as any other Fern introduced. Compact, vigorous and thrives under most any condition. Price, 25 cents; large, 50 cents.

Boston Fern

ASPARAGUS FERNS

Their beautiful sprays of lovely, feathery foliage can be cut freely for bouquets, etc.

ASPARAGUS SPRENGERII. Emerald Feather. Very valuable for vases and baskets. A strong, vigorous plant, very easily grown and requires little care. Price, 15 cents and 25 cents each.

ASPARAGUS PLUMOSUS. Climbing Lace Fern. An extremely graceful window climber. The fine, feathery foliage is always bright and green. Price, 15 cents and 25 cents each.

DUKE DE MONTMORT. Trusses of enormous size; color brilliant pink, shaded lavender, nearest we have to the blue Geranium. Highly recommended.

E. H. TREGO. This is another splendid scarlet bedding variety that gives satisfaction. It stands heat and dry weather, producing immense quantities of bright scarlet double flowers all through the season. An exceptionally fine Geranium.

HELEN MICHELL. The clearest shade of scarlet, early in bloom, and flowers very freely during the entire season. Grows compact and throws up gigantic flower heads freely. It is a common occurrence that single four-inch pot plant shows four fully open gigantic flower heads, several half-open and more in bud.

ROBERT CHARLIE. A distinct, salmon-pink with a light scarlet shading, enormous trusses and florets borne on long stems; semi-dwarf and vigorous habit. With its noble upright nature it is capable of standing the extreme heat. An excellent pot variety, being an early bloomer.

MARQUIS DE CASTELAINE. A giant among Geraniums. Produces a wealth of bloom the whole season. Color deep rosy-scarlet, shading into pure scarlet at the edge of the upper petals. One of the best Red Geraniums.

SPAULDING PET. This is a profuse bloomer with large, bright scarlet flowers, semi-double, and has the remarkable faculty of blooming right through the hottest and driest weather; it also is a luxuriant grower. This is a variety that is especially desirable for the South.

QUEEN OF CRIMSON, S. A. NUTT. The best dark, rich crimson bedding Geranium; blooms incessantly. This is the darkest and richest Geranium grown. It is very bright, dark, deep rich velvety maroon, an excellent bedder and a perfect pot plant, one that must find its way into every collection. Stands the sun perfectly and is always a mass of bloom.

15 cents each **BEST SINGLE GERANIUMS** \$1.50 per dozen

GRANVILLE. One of the finest of all the single pinks for bedding or pot culture. The plant is a prolific bloomer, and of strong, robust habit of growth. The flowers are held high above the foliage by good, long stems, forming a mass of soft clear pink.

MRS. E. G. HILL. A magnificent variety; enormous trusses of large florets; the center of each petal is a soft light salmon bordered with rosy salmon; habit exceptionally strong and vigorous; attractively zoned; semi-dwarf; stands the sun perfectly. An old favorite bedder and pot variety.

PAMELIA. A very distinct and pleasing combination of color; white ground with charming gradation of shades, from white throat through a beautiful shade of violet crimson to an intense scarlet margin.

PAUL CRAMPEL. The finest bedder extant; the freest grower among free-flowering sorts that we have ever met; habit perfect; freedom, wonderful; attracts attention among hundreds of other sorts. The color is brilliant scarlet with large plume of white at base of upper petals; a most effective bedder.

TIFFIN. Glowing Scarlet, Crimson-Maroon Shading. This might be called an everblooming variety because it blooms so freely. It is an excellent bedding variety. Color rich, glowing scarlet, crimson-maroon shading.

WATERMELON. A splendid deep pure pink of a lively shade. Grand habit of growth, compact and yet well branching; very free in bloom, of large size. A wonderful bedder and an excellent pot variety.

They are suitable alike for winter blooming or for growing outdoors, either in beds or in pots, boxes or vases, as the case may be. A collection of flowering plants is not complete without Fuchsias, and the extremely low price at which splendid sorts are offered permits of a choice collection of different varieties. Price, 15 cents each; 4 distinct kinds for 50 cents.

SWEET-SCENTED GERANIUMS

15 cents each; two for 25 cents.

LARGE LEAF ROSE. Indispensable in the formation of bouquets.

Strawberry Geranium

The Strawberry Geranium

New Everblooming Pelargonium Easter Greetings

The flowers of Easter Greeting have the large size and the gorgeously rich coloring of the "Lady Washington Geranium." To this is added, in Easter Greeting, the habit of continuous blooming, which has made the ordinary bedding Geranium so highly valued. Easter Greeting is the first of a new race and one of the most valuable introductions in recent years. As an Easter plant it rivals the Azalea; but unlike the Azalea, Easter Greeting will remain in full bloom all summer. Each 20 cents; larger, 35 cents.

APPLE-SCENTED GERANIUMS

There are few, indeed, who are not acquainted with this grand old favorite. A plant of it will fill a room with its delicious odor, which is precisely like the fragrance of apple blossoms. Price 20 cents each.

IVY-LEAVED GERANIUMS

Nothing more desirable for baskets, vases or for any trailing or climbing plant utility. Price, 20 cents each.

ALLIANCE. A happy alliance of the soft, waxy finish of the Ivy class with the constitutional virility of the Zonales. The flowers are gracefully semi-double, very freely borne in trusses of conspicuous size. Delicate lilac-white, upper petals feathered and blotched crimson-rose.

CAESAR FRANCK. Enormous trusses of semi-double flowers, shaped and clustered much like "Crimson Rambler" Rose; vividly crimson, with a slight dash of rose at the base of the petals.

Exceedingly curious and interesting novelty; unlike any decorative plant. Bound to have a large sale on account of its oddity and rarity. Price 30 cents each.

Pansies

OUR SUPERB PANSIES

Pansy plants planted in the spring as soon as the frost is out of the ground will begin to bloom at once, and afford daily pleasure for a month before Coleus or Geraniums could even be planted. If snow should fall after planting they would not be hurt. In fact, to get the best results from Pansies, they should be planted just as early as they can be. To get best results and extra large flowers, the soil must be extremely rich—we use equal parts of well rotted manure and soil. Price, 5 cents each; 50 cents per dozen.

DUSTY MILLER

Almost too well known for a description. This is the old Dusty Miller used for edging beds of Coleus, Geraniums, Cannas, etc. Leaves silvery white. Price, 10 cents each; \$1.00 per dozen.

MAMMOTH VERBENAS

Next to the Geranium the Verbenas are the most popular and useful of bedding plants. The collection we offer is as fine a collection as could be found on this continent, containing the most brilliant colors and some right fragrant varieties. In order to keep the plant in the best blooming condition, cut all faded flowers off, and even a severe trimming or clipping tends to strengthen the plants and keep them in better shape for late flowering. With proper care your Verbenas may be kept in blossom long after other flowers have gone. The demand we had the past season for this popular flower is enormous. Price, 10 cents each; twelve for 75 cents.

Salvias can be grown in almost any position with fine effect; in the flower bed; along the walk or borders. They also add to the attractiveness of a shrubbery if planted in clumps in the vacant spaces, the varied shades of green and the dazzling scarlet have a most pleasing effect. We offer only the large flowered variety which produces flowers twice the size and twice as numerous as the old variety. They make fine pot plants for the conservatory or greenhouse. TRITOMA (Red Hot Poker)

SCARLET FOUNTAIN PLANT (Russelia)

A Charming Basket or Vase Plant.

Scarlet Fountain Plant

A novel and beautiful plant, suitable either for bedding or pot culture. Has long, wiry, leafless stems, drooping and bearing quantities of long, tubular flowers of the most vivid scarlet color. The great drooping masses of blooms are like a fountain of coral, scarlet and green. In the South it is perfectly hardy and a superb garden flower. In any climate it is one of the very easiest of plants to grow, and one of the most brilliant and persistent of bloomers. Price, 15 cents each; 2 for 25 cents.

BRUGMANSIA

ANGEL'S TRUMPET. It grows easily, blooms freely and the flower is something to be proud of. The Brugmansia blooms indoors in winter and in the garden in summer. The plant has large, tropical leaves, with blooms 8 inches wide at the mouth, resembling a trumpet, hence the name, "Angel's Trumpet." Pure white in color and as fragrant as a Jasmine. Extra strong plants, 35 cents each.

March 18th, 1922—The Rose plants arrived this morning and am delighted with the order and thank you very much for your promptness and liberal order.—Mrs. G. B., Pine Bluff.

TRITOMA

(Red Hot Poker, Flame Flower, or Torch Lily)

(The Everblooming Flame Flower). The early, free and continuous blooming qualities of this variety has made it one of the great bedding plants, and when we consider that there are few flowering plants which are suitable for massing under our severe climatic conditions, it is little wonder that such an elegant subject should become so popular. Succeeds in any ordinary garden soil, but responds quickly to liberal treatment; hardy if given protection, but the most satisfactory method of wintering is to bury the roots in sand in a cool cellar. In bloom from August to October, with spikes 3 to 4 feet high, and heads of bloom of a rich orange scarlet, producing a grand effect either planted singly in the border or in masses (See cut). Price, 35 cents each; 3 for \$1.00.

Jos. W. Vestal & Son,

October 13th, 1922.

Dear Sirs—I want to tell you that my Rose garden was an attraction and a marvel to everyone in the spring, not only to those living in my own neighborhood but persons living in other parts of the city made a special trip to see the Roses in all their gorgeous beauty. I am happy over my success, as I am only an amateur, tho they are a joy and my delight, and I take pleasure in answering the oft repeated inquiry, "Where do you buy your plants?" They are Vestal Roses. Have only lost two or three.

Yours,

Dear Sirs—The bulbs I ordered from you this fall arrived in fine condition. Are all growing and the Giant White Narcissus commenced to bloom November 26th, have never enjoyed anything more than I have them. I sure will order a few more bulbs next fall as you have the nicest and the largest bulbs of any house I have ever order from.

The Roses I ordered from you a few years ago are doing well, and the most beautiful Roses I ever saw. I now have 43 rose bushes in my garden and am glad to say that two-thirds of these are from your house or at least originated there. I rooted a number from the Roses I bought from you.

Yours truly,

Miss Lula McC.,

Large Double Flowering Peonies

Peonia

GERMAN IRIS

Blooms earlier than Japan Iris. This variety is the true "Fleur de Lis," the national flower of France. They are perfectly hardy, thrive anywhere, deliciously fragrant and fine for cutting. In beauty the flowers rival the finest Orchids, the colors ranging through richest yellow, intense purples, delicate blues, soft mauves, white and bronze of every imaginable shade. We offer five distinct colors. Price 20 cents each; 6 for \$1.00.

Once planted they will last a lifetime with little care. They grow from one to three feet high, producing magnificent blooms, which sometimes almost surpass the beauty of the Rose. Another point which is largely in their favor, is the fact that the plants are never attacked by either insects, animal or fungal diseases. Peonies will succeed in most any kind of soil, but give best results when planted in a deep, rich and somewhat moist loam.

LOUIS VAN HOUTE. Medium sized, double, midseason; the most nearly scarlet of any red Peony. Price, 75 cents.

FRAGRANS. Solferino-red with slight silvery reflex. Compact, bomb type, strong vigorous grower, medium size, late. Price, 75 cents.

FESTIVA MAXIMA. About the largest and undoubtedly the most popular Peony of them all. High built flowers borne on long stiff stems, the purest white, inner petals slightly tipped with carmine. Early. Price, 75 cents.

EDULIS SUPERBA. Very soft salmon-pink, changing to bluish white. Blooms habitually in broad clusters and makes a fine bedder. Price, 75 cents.

MADAME CALOT. This is the freest flowering of all Peonies. It is known in Holland as the Glory of Boskoop. Flesh-white, shaded salmon; large convex flowers, fine buds, extra for cut flowers. Price, 75 cents.

Some Shrubs That Bloom

In corners of the grounds, at curves in the walks and driveways, and at the house foundations are excellent places to plant shrubs. They should always be in groups, unless their ultimate size will be quite large. Lilacs may be used in specimen plantings, but low-growing shrubs, such as the Spireas, etc., should be set in clumps. In grouping it is always good policy to plant the taller growing varieties back of the lower sorts. This gives a "step-down" effect, and seems to join the house to the lawn.

DOUBLE ALTHEAS—Rose of Sharon

They grow neat and compact, and make nice shapely trees, four to six feet high. They bloom in August and September, when other flowers are scarce, and are literally covered with large, perfectly double flowers, like roses, of different brilliant and striking colors. Price, 50 cents each.

JOAN d'ARC. This is entirely new, and the finest Double White Althea ever introduced; grows regular and compact, and is literally covered with large, perfectly double pure white flowers, three inches across.

LUCY. Large, double rose-red flowers; very handsome.

TOTUS ALBUS. Finest single pure white.

ABELIA GRANDIFLORA

After a thorough test in different parts of the South we find this one of our most beautiful evergreens when planted half shaded position. The graceful drooping stems are covered with dark glossy leaves and produce an immense quantity of tubular shaped white flowers about an inch long, borne in clusters from the middle of May until frost. During the growing season, it is advisable to pinch off the ends of the shoots—this will make the bush dense and compact. This plant is very valuable for single specimens, for groups or for a hedge. Price, large plants, 75 cents each, or 3 for \$2.00.

BUDDLEIA

VARIABILIS VEITCHIANA. (Butterfly Shrub, or Summer Lilac.) Violet-mauve flowers, borne in spikes 12 to 15 inches long; blooms from July till frost. Should have winter protection. Two-year, 50 cents.

Grape Vines

There is scarcely a yard so small, either in country or city, that room for one to a dozen or more grape vines cannot be found. They do admirably trained up by the side of any building, or along the garden fences, occupying but little room and furnishing an abundance of the healthiest of fruits. Make the soil mellow and plant the vines somewhat deeper than they stood in the nursery. Plant about eight feet apart, by the fence or building. For vineyard, makes rows eight feet apart, six to ten feet in rows. Grapes are ornamental as well as fruitful. Plant them wherever you have a place where vines can be tied. You can plant them against buildings, over arches, on trellises, etc. These vines grow fast, they have large leaves, and make welcome shade in summer. Price, 40 cents each; \$4.00 per dozen.

AGAWAM. Berries very large, with thick skin, pulp soft, sweet and sprightly, very vigorous, ripens early.

BRIGHTON. Large compact bunches, rich wine color, tender and almost seedless, sugary, juicy and rich flavor. Having thick foliage, it is enabled to withstand the heat of summer. We recommend this variety for vineyard or garden.

CONCORD. The old standby. A large purple grape, moderately sweet and juicy; hardy, productive and adapted to almost any soil.

DELAWARE. Bunches small, compact, shouldered. Berries rather small, round, skin thin, light red. Flesh very juicy and without hard pulp. Flavor sweet, spicy, delicious.

NIAGARA. Bunch medium to large, compact, sometimes shouldered. Berries large, skin thin but tough, pale green at first, changing to pale yellow when fully ripe, with a thin whitish bloom. Flesh slightly pulpy, tender and sweet. It has a musky odor which disappears when fully ripe. Ripens with Concord.

WORDEN. A splendid grape of the Concord type, larger, better quality and earlier. Vine vigorous; hardy and productive.

MARTHA. Bunch and berries large, when fully ripe a light golden yellow; juicy, tender, sweet. One of the most satisfactory white varieties.

MOORE'S EARLY. Bunch large, berry large round, with heavy bloom, vine exceedingly hardy. Its earliness makes it desirable; succeeds admirably in the South. Blue Black.

IMPROVED KLONDIKE. This variety is noted for its large yields of beautiful berries, uniform in shape, rich blood-red color and having a flavor that is neither sweet nor sour, but mildly delicious.

LADY THOMPSON. Early, strong, upright plants, root deeply; many long runners. Thrives in all soils, but best in rich loam or sand. Berries medium to large, regular, glossy pink, solid, meaty, excellent.

SENATOR DUNLAP. Thoroughly tested and proved one of the best standard varieties wherever tried; strong, hardy, deep-rooted plants; a great bearer of bright, glossy red berries of first-class quality.

EXCELSIOR. This variety is one of the very best extra earlies yet introduced, and is a vigorous, healthy grower—unusually productive for so early a sort—outyielding other standard earlies two to one, while the fruit averages large, is very handsome and firm.

GANDY. A reliable late variety, berries bright crimson, very uniform in size and shape, large and firm, plants vigorous and healthy.

ST. LOUIS. One of the largest and finest berries grown, and being a heavy yielder as well, steadily is winning its way to a prominent place in the confidence of Strawberry growers. In shape the berry is conical and long, having an obtuse point. In color it is dark, lustrous shade of crimson, and is studded with brilliant, golden seeds, all of which tend to make it one of the handsomest berries.

Vestal's Earliest Strawberry

Of all strawberries in our list, this ripens the earliest, producing an abundance of perfectly round, beautiful berries of very rich and delicious flavor. In fact it is one of the most productive varieties we have and as it ripens so extremely early it is the favorite home garden variety and also for the large grower, as the market price of the fruit is often 20 cents per quart. A delicious table berry and one of the very best for family use. Price, 25 for \$1.00; 100 for \$2.00.

Fall Bearing Strawberries

Fall-bearing Strawberries seem to be no longer an experiment, as they are becoming essential all over the country, and are making good every place they have been tested. If these varieties are disbudded, until say August 15 to September 1, and allowed to fruit, they will give large quantities of ripe berries until checked by hard freezing. The variety we offer we consider the best.

PROGRESSIVE. This is the strongest growing plant of all the fall-bearing varieties we have seen. The plants are very large and heavily rooted, producing a phenomenal crop of medium to large fruits, of a dark red color both inside and out.

Price, 25 for 75 cents; 50 for \$1.25; 100 for \$2.00, postpaid.

THE GREAT COLUMBIAN RASPBERRY. Hardy and vigorous, often growing eight to ten feet in a season, and standing any degree of frost and drouth. It is propagated by tips, and its productiveness is most astonishing. We know of no variety that can compare with it. The berries are large, dark purple, firm as to texture, with an agreeable, pure, rich flavor, which is brought to its highest flavor when canned or cooked. The most prolific of any sort known, the fruit fairly hanging in masses. A row or hedge of it is a sight to behold.

Selected Vegetable Plants

This page and the next one tell you how you can have a successful vegetable garden without waiting for seeds to grow. If you buy the plants from us, ready started, you gain over a month, and have a supply of fresh, crisp, choice vegetables for your table almost before you know it. What a joy it is to step out from your kitchen door and gather from your own yard the vegetables you want, in all their original freshness and delicious goodness!

A few Artichokes; some choice Tomatoes; a sprig or two of Parsley—possibly a Cabbage or Cauliflower, and there's your meal. Such vegetables are not dust covered. Not dried and withered. Not stale and unappetizing. Not handled three or four or five times before they reach you. But clean—and palate-pleasing—right from your own garden to your own table.

You don't need a lot of ground in which to grow a home supply. A few square feet of garden is enough. Order a few plants of the varieties you prefer and you will have fresh vegetables at your command all the year round.

When plants like these are so easily grown—and when the cost of living is so high today—we can not understand why every housewife does not grow her own vegetables. The cost of growing is practically nothing—and one can not buy such vegetables as one can pick from one's own garden patch.

Vestal's Beautiful Sweet Peas

OUR NEW MIXED SWEET PEAS. This surpassing mixture includes the very finest and most distinct varieties now in cultivation. No strain offered will give better results and all who buy will be more than pleased.

VESTAL'S SPECIAL BLEND SPENCER SWEET PEAS

If planted now they will blossom forth in a riot of brilliant beauty during May and June.

Among recent Sweet Pea novelties there has appeared nothing finer than the new race of Orchid Flowering or Countess Spencer Peas.

They are distinguished for their gigantic size—usually measuring two inches across. The bold, erect standards, which are uniformly waved, crimped and fluted in exquisite fashion, the charming blending of harmonious colors, the exceedingly long stems, which make them excellent for cutting; the great profusion of flowers and the large number on the stems, usually three or four, make this type so superior in every way that we believe it is certain to supersede the old varieties.

The Sweet Peas in our SPECIAL SPENCER BLEND are made up of the finest named Spencer varieties and range in color from the purest white to shades of pink, lavender, blue, yellow and crimson, and are just the kind to make your garden a success. It is the very best blend possible to produce and will surely delight all who want a great variety of colors. Price, per packet of 110 to 125 seed, 20 cents; per ounce, 40 cents, postpaid.

VESTAL'S "PRIZE" MIXTURE

OF GRANDIFLORA, OR LARGE FLOWERING SWEET PEAS

This superb mixture is our special pride. During the several years we have sold it, it has been our constant aim to improve and perfect it. The different kinds and sorts contained in this mixture are grown separately, so that we have an opportunity to choose only the largest and most beautiful varieties. These we mix ourselves in proper proportions for the most brilliant effect. It embraces the finest American and Eckford varieties, as well as the latest novelties, and will produce a great abundance of giant flowers of beautiful colors. Some are edged, mottled, blended, flaked and striped. Without exception this is the very finest mixture it is possible to make. We recommend that our customers buy these seeds by weight and plant liberally. Price, per packet, 10 cents; ounce, 20 cents; pound, \$2.00.

SALVIA

The Salvia is now a standard bedding plant, and well deserves its honor. Seed is best started under glass, though self-sown seed frequently comes up in great numbers where a bed of these plants has been the previous year.

SPLENDENS. Large, scarlet; exceedingly showy and useful for cutting and for ornamental beds. Price, per packet, 10 cents.

NEW SALVIA "SCARLET DRAGON" or FIREBALL

A new dwarf, extra early flowering variety. The plant itself rarely grows over a foot high, while the erect spikes of brilliant scarlet flowers average a foot in length making the total height of the plant when in full bloom between 20 and 24 inches by about the same in diameter. This new variety is most highly valued because it begins to bloom many weeks before the older sorts; continues a veritable "ball of fire" throughout the summer and fall. Price, per packet, 20 cents.

This native annual is quite popular as a garden plant on account of its showy appearance and ease of culture in almost any soil—even the poorest—if in a sunny location. It occupies a first place as a garden annual, being one of the most brilliant and at the same time one of the easiest and most satisfactory plants, which can readily be grown from seed. Seed may be sown in the open ground any time after danger from frost is past, and in a few weeks they are in a sheet of bloom, remaining so until frost. They may be used in a variety of ways, such as a carpet to beds of

Roses, in beds or borders, that they show to best advantage. Price, 10 cents; two packets, 15 cents; five packets, 40 cents.

Great "May Day" Sale

From May 10 to
June 10

CHOICE PLANTS AT GREATLY REDUCED PRICES. In growing so many varieties of plants in such large quantities we can not anticipate orders and grow just what will be required of each variety to meet the demand. We always want to make sure we have enough of everything, and consequently we usually have a surplus of many of our choicest plants. Now, in order to close out surplus stock at or near the end of the season we have decided to offer them at greatly reduced prices for thirty days after May 10, or from May 10 to June 10. Persons ordering these collections will be surprised at the number and value of the plants they will contain; in fact, were we to foot them all up at catalogue prices, you would be getting them at less than half price. We reserve the right to select the varieties, but will allow purchase, to state for what purpose intended, whether for pot culture or bedding; but unless otherwise ordered, the collection will contain plants for both pot culture and bedding. All orders received prior to May 10th will be forwarded promptly on that date. One Hundred Choice Plants by Express for \$5.00. Thirty-five Choice Plants for \$2.00.

NOTE—Where patrons have no express office we will send the offer of 35 plants by parcel post for \$2.35.

Vestal's Special Mixture Southern States Evergreen Lawn Grass Seed

Southern States Evergreen Lawn Grass Seed

For the convenience of those of our customers who object to the Bermuda Grass, we have decided to offer them this year **Southern States Evergreen Lawn Grass Mixture**. A mixture of the best grasses that exist for general planting in the Southern States. Most lawn grass mixtures are of little use in the South, as they burn out in dry summers. **Vestal's Evergreen Lawn Grass Seed** is a well balanced scientific blending of the best American grasses which will flourish under varied and adverse conditions of soil and are by nature adapted to hot, dry climates. It quickly produces a firm, deep velvety and elastic turf and holds its beautiful emerald green color throughout the season.

By using **Vestal's Evergreen Lawn Grass Seed** and with some care and attention to watering, an all-the-year-round lawn can be maintained in the Southern States where lawns generally do not thrive. For a plat 15x20 feet, or 300 square feet, use one quart. Price, delivered free, 45 cents per quart; \$1.25 for 3 quarts; \$2.00 for 6 quarts.
